No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                         US-10-797-821-32

GENERAL INFORMATION:

APPLICANT: Lynn Doucette-Stamm et al TITLE OF INVENDATION:

TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO STAPHYLOCOCCUS TITLE OF INVENTION: BPIDERALIS FOR DIAGNOSTICS AND THERAPEUTICS

FILE REPERENCE: GTC-607

CURRENT APPLICATION NUMBER: US 60/064,964

PRIOR PILING DATE: 1998-08-13

PRIOR FILING DATE: 1997-10-8

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Sequence 3056,
